

EXT Shock Order Form

We have been very pleased with EXT's work and service and want to make sure your experience with their shocks has been as positive as ours. All the info you put in this form will be relayed directly to EXT USA for their use in tuning your shock. As such, the accuracy of your replies is extremely important. Please be very honest with yourself.

This is about what you want, not what you think you should want, so focus on what goes through your head when you are out riding. It is okay to say you want a shock that completely smooths out bumps at the expense of support. Similarly, it is okay to have it the other way around. We all have our preferences. Honesty with skill level is also quite important. Having your shock tuned to your ability level will make your bike ride better for you, which will in turn allow you to progress quicker. So, if you're at 5, circle 5 and you will find yourself at 6 quicker than you would if you had circled 7.

Cascade Order Number:

CC-USA-_____

Confirm shock size:

Confirm link this is going with:

Frame size:

XS / S / M / LG / XL / XXL

S1 / S2 / S3 / S4 / S5 / S6
